

Our Focus Is the Solution and the Value of the Solution to You

338 Business Circle
Pelham, AL 35124
P. (205) 504-0747

Since 2001 the engineering team at Southern Tool Specialist has been the leader in manufacturing process systems solutions in the Southeast - with special expertise in fastening, drilling applications, and material handling. We serve all segments, working with the biggest and the best.

STS invests heavily to build an expert team of degreed engineers plus other technical backgrounds -- with diverse aptitudes and strengths. Then trained-up in service excellence. We have the skill sets and experience *in-house* to solve and offer long-term applications. There is strength in numbers!

We offer a full Atlas Copco product line, plus carefully evaluated solutions from others ensuring specialization and expertise in the products we represent. Your solution will be the best it can be, based on the highest quality tools, the most reliable and advanced systems, plus the best engineering application design.

We are known by our partners and customers for our experience, expertise, and a get-it-done commitment to crafting custom solutions *for you*. What can we solve for you today?

We Are Pleased to Distribute & Partner With

A World Leader in Industrial Tools
& Assembly Systems

High-Precision Drilling Systems for the
Automotive and Aerospace Industries
